

ANDROID · INSTALL

Install Fastmail on your Android phone

Get the Fastmail app from Google Play and set it up in about a minute. No technical know-how required — just follow the steps below.

Quick Steps

- 1 On your phone, open `fastmail.com/download` in your browser.
- 2 Tap **Download for Android** — this opens the **Google Play Store**.
- 3 On the Fastmail page, tap the green **Install** button.
- 4 Wait for it to install, then tap **Open**.
- 5 Sign in with your Fastmail email and password.

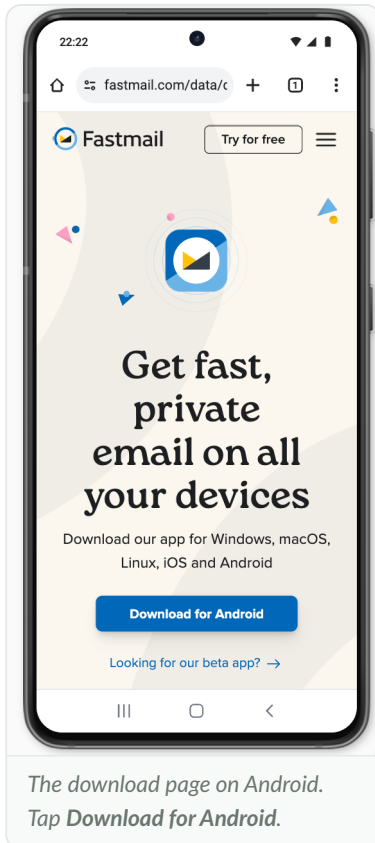

! Make sure it's the official app.

The right one is **Fastmail** from the developer **Fastmail Pty Ltd**. Tapping **Download for Android** on the website takes you straight to it, so you can't go wrong.

Illustrated Walkthrough

1 Open the download page on your phone

In your phone's web browser, go to `fastmail.com/download`. Tap the blue **Download for Android** button.

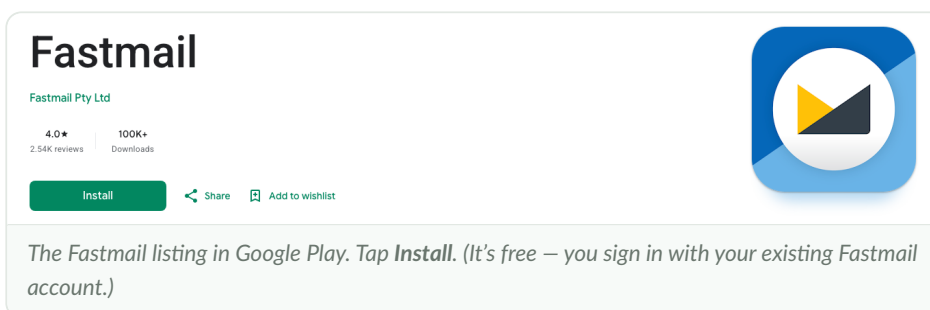

*The download page on Android.
Tap Download for Android.*

💡 Prefer the Play Store directly?

You can also open the **Google Play Store** app, tap **Search**, and look up **Fastmail** — it lands on the same page as the next step.

2 Install from Google Play

The button takes you to the **Fastmail** page in the Google Play Store. Tap the green **Install** button and wait a few seconds while it downloads.

3 Open the app

When the download finishes, the button changes to **Open** — tap it. You'll also find a new **Fastmail** icon in your app drawer (and usually on your Home screen) that you can tap any time.

4 Sign in

When Fastmail opens, sign in with your Fastmail email address and password to start using your mail, calendar, and contacts.

➤ **Signing in is covered separately.**

See the **Signing In** guide for step-by-step sign-in via the app or a web browser.
