

IPHONE & IPAD · INSTALL

Install Fastmail on your iPhone and iPad

Get the Fastmail app from the App Store and set it up in about a minute. It's the same app on both iPhone and iPad, so these steps work for either — no technical know-how required.

Quick Steps

- 1 Open the **App Store** on your iPhone or iPad.
- 2 Tap **Search**, type **Fastmail**, and search.
- 3 Tap the official **Fastmail – Email & Calendar** app.
- 4 Tap **Get** to install (confirm with Face ID, Touch ID, or your Apple Account if asked).
- 5 Tap **Open**, then sign in.

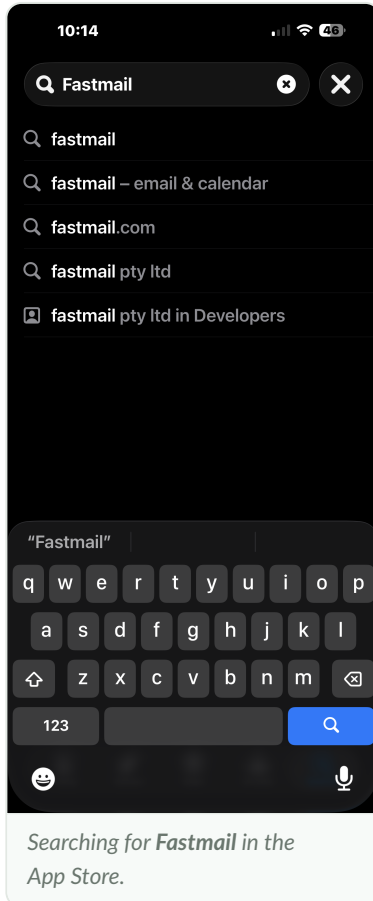

! Make sure it's the official app.

The right one is **Fastmail – Email & Calendar** from the developer **Fastmail**. It's free and rated 4+. If you see similarly named apps, check the developer before tapping Get.

Illustrated Walkthrough

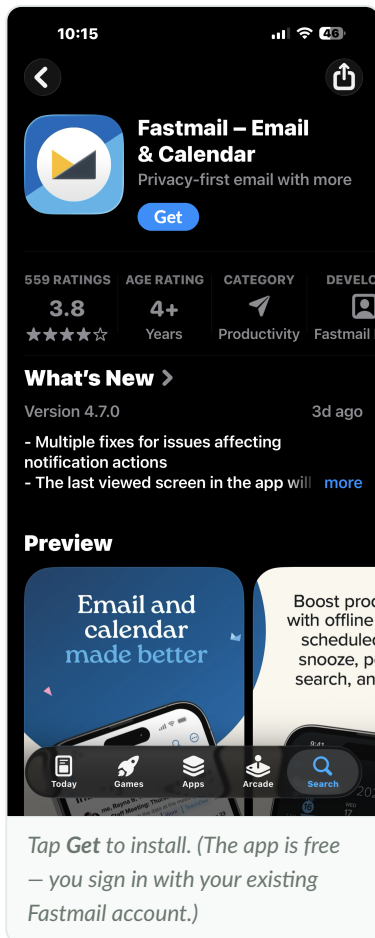

1 Search the App Store for Fastmail

Open the **App Store**, tap the **Search** tab at the bottom, and type **Fastmail**. Tap the **Fastmail – email & calendar** result (or the magnifying-glass search button).

2 Open the app page and tap Get

Tap the official **Fastmail – Email & Calendar** app to open its page, then tap the blue **Get** button to install it. If prompted, confirm with **Face ID**, **Touch ID**, or your **Apple Account** password.

3 Wait for it to install, then tap Open

A progress circle appears while the app downloads. When it finishes, the button changes to **Open** — tap it. You'll also find a new **Fastmail** icon on your Home Screen that you can tap any time.

4 Sign in

When Fastmail opens, sign in with your Fastmail email address and password to start using your mail, calendar, and contacts.

➤ **Signing in is covered separately.**

See the **Signing In** guide for step-by-step sign-in via the app or a web browser.
